- Operating Systems: Linux, MacOS, Windows
- Developer Tools: Android Studio, Eclipse, IntelliJ, VirtualBox, Visual Studio, Webots, Xcode

PERSONAL PROJECTS

Discord Bot Application   **August 2019-January 2020**
- Developed in JavaScript with various functionalities such as queueing music into a playlist that are stored in JSON, from websites like YouTube, to be broadcasted in voice channels
- Utilized Discord's API to send messages in response to a Discord user's commands

Discord Bot Application   **April 2020-May 2020**
- Re-developed in Java to explore an alternative approach using constructors that would get info of command class files that are made independently from the application's code

Github Page   **Late 2023**
- HTML files to bring together information about myself and showcase projects

Image Compressor   **June 2024**
- Wrote a Python script that downsizes an image type file to a file size, with the inspiration to compress images to meet Discord's file size limits

WORK EXPERIENCE

Clerk (Various Positions)   **September 2022-Present**
Metro Inc., Ottawa, ON
